

Introducing IntraLAN Mobile

IntraLAN's Mobile service focuses on providing the highest support service to reduce your mobile running costs and administration.

Backed up by a thoroughbred IT company (16 years as Microsoft Gold Partner), we can support your BlackBerry and Exchange servers, even remotely taking over your BlackBerry/Windows/Android/iPhone handsets!

We work with all the mobile carriers and hardware manufacturers to ensure the ideal match to your business requirements.

By being network independent, we seek to ensure you get the best package for your needs with proactive planned upgrades, so we always ensure the maximum payout from the networks is available to you.

Mobile Services

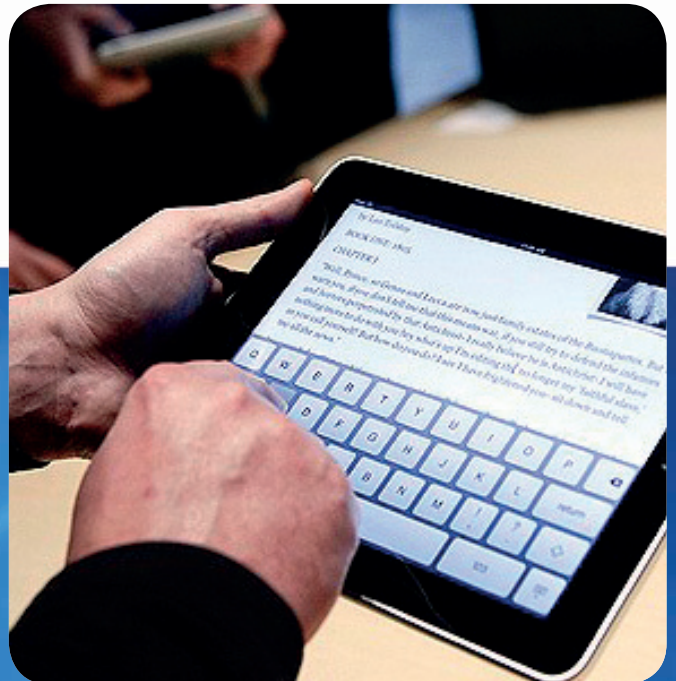

Key Business Benefits

What company can offer and support all of these services under one roof?

- Server installation and on-going technical support (handsets and servers);
 - Support for back-office servers (Exchange + BES);
 - Remote management of handsets
- Asset management including insurance & direct replacement;
 - Replacement handsets pre-configured and shipped to user within 48 hours;
 - SIM back-up;
 - Lloyds handset insurance covering theft, loss, accidental damage from 5p/day;
- Integration with PBX (e.g. Extension Anywhere);
 - One number finds you!
 - Centralised recording of all mobile calls;
 - Live call statistics & drill-down reports.

Would you rather deal with a company whose roots are in IT, making it ideally placed to cope with mobile and fixed telephony convergence?

- Analysis of potential cost savings (we have bespoke airtime packages) across all 4 UK networks;
- Support & strategic guidance on best-use of current technology (especially email + data access);
- On-line billing & reporting (summary by mobile, most called number, most expensive number etc).

Services Offered

- Full audit of your existing investment and costs;
- Continued regular reviews & dedicated account management;
- Hardware upgrades or cashback;
- Car kits installed at workplace;
- GPS tracking of handsets with mobile usage monitoring and Geo Fencing;
- Bespoke applications to push office systems to remote users.

Technical Support Packages

Tier 1	Basic telephone device support	Included within Package
Tier 2	Plus remote takeover of handsets, technical support for BES/Exchange, pre-configured handsets	From £2.00 per month per handset supported

The mobile market is forever changing, with exciting new technologies and devices being launched on a monthly basis from a plethora of suppliers. Not only are we offering connections to the networks, we add value by understanding the benefits of these devices, to advise you of the correct solution to match your budget and technical requirements.

If your business would benefit from a free-of-charge cost audit of your current mobile spend, or you would like to have peace of mind when any of your mobile devices break down, or require modification, then IntraLAN, with its credentials in IT, can deliver a fully managed solution.
