

## **Environmental & Sustainability Statement**

At IntraLAN, we recognise the importance of sustainability and environmental responsibility in everything we do. We are committed to minimising our environmental impact and continuously improving our business practices to support a greener future.

### **Our Commitment**

- **Reducing Carbon Footprint** – We actively seek to lower emissions by optimising energy use, reducing travel where possible, and embracing remote collaboration.
- **Sustainable IT Practices** – We encourage responsible IT asset disposal, recycling, and refurbishment to minimise e-waste.
- **Green Procurement** – We prioritise working with suppliers and partners who follow ethical and sustainable manufacturing and supply chain practices.
- **Energy Efficiency** – We strive to reduce energy consumption in our offices and data centres, adopting low-energy solutions and responsible resource management.
- **Employee Engagement** – We promote sustainability awareness among our employees, encouraging eco-friendly work practices and responsible waste management.

### **Looking Forward**

We continuously assess and refine our environmental policies to align with best practices and industry standards. By integrating sustainability into our operations, we aim to make a positive impact on the environment while delivering excellent services to our customers.
